ADDITIONAL ORGANIC SOLUTIONS

Nature's **Kos** goes beyond fertilisers. We source, stock and supply a carefully selected **range of natural minerals, organic stimulants, and organic pesticides** to provide farmers and growers with a complete, integrated solution built on **natural and organic principles**.

Our product portfolio is designed to **support the full production cycle**, from soil conditioning and plant nutrition to crop protection and biological stimulation. By combining these natural elements into practical, field-ready programmes, we help farmers reduce dependence on synthetic inputs while maintaining productivity and profitability.

Through responsible sourcing, strict quality control, and ongoing field validation, **Nature's Kos** delivers solutions that **work with Nature** to restore soil health, strengthen plant resilience, and improve long-term farm sustainability.

Nature's Kos: Integrating natural solutions today for a more sustainable agricultural future.

Additional Product range

Rock Phosphate is a naturally occurring mineral source of phosphorus essential for early root development, energy transfer, and overall plant establishment. As a slow-release nutrient source, it provides long-term phosphorus availability while supporting sustainable soil fertility.

- Promotes strong root growth and early plant vigour
- Supports flowering and fruit development

Potash Powder is a natural source of potassium, an essential nutrient responsible for plant strength, water regulation, and crop quality. Potassium plays a vital role in enzyme activation, nutrient transport, and stress tolerance, making it critical during flowering, fruiting, and grain-filling stages.

- Improves drought tolerance and water-use efficiency
- Supports disease resistance and overall plant resilience

Potassium Humate 98% is a highly concentrated source of humic substances designed to improve soil structure, enhance nutrient availability, and stimulate root development. Derived from natural humic deposits, it plays a key role in building long-term soil fertility and improving overall crop performance.

- Reduces nutrient leaching in sandy soils
- Supports improved plant resilience and uniform growth

Seaweed Powder is a natural plant biostimulant derived from marine seaweed, rich in trace minerals, amino acids, and natural growth-promoting compounds. It enhances plant vitality by stimulating root development, improving nutrient uptake, and strengthening overall plant resilience.

- Enhances nutrient absorption and metabolic activity
- Promotes uniform growth and improved crop quality

Castor Oil Cake is an organic fertiliser and soil conditioner derived from the residual material after oil extraction from castor seeds. Rich in organic nitrogen and beneficial compounds, it provides slow-release nutrition while improving soil health and biological activity.

- Supplies organic nitrogen for steady plant growth
- Helps suppress certain soil pests when incorporated into the soil

Neem Oil is a plant-based organic pesticide derived from the seeds of the neem tree. It provides effective, broad-spectrum protection against common crop and garden pests while supporting environmentally responsible farming practices.

- Controls a wide range of sucking and chewing insects
- Disrupts insect feeding, breeding, and life cycles
- Helps reduce aphids, thrips, whiteflies, mites, caterpillars, and scale insects

Neem Powder (or Neem Flakes) is a natural soil amendment produced from processed neem seed material. Rich in bioactive compounds, it provides mild organic nutrition while supporting natural pest suppression within the soil.

- Helps reduce soil-dwelling pests and nematode activity
- Supports healthier root zone development
- Enhances soil microbial balance

Cocopeat is a natural, biodegradable growing medium derived from coconut husk fibre. Known for its excellent water-holding capacity and aeration properties, it provides an ideal environment for seed germination and early root development.

- Promotes uniform and vigorous seed germination
- Encourages strong, healthy root systems
- Retains moisture while maintaining proper drainage

- All transport cost to be borne by Client/Customer/Farmer
- all prices are ex VAT.
- It must be noted that VAT registered Farms will not be charged VAT, as fertiliser is a zero rate input product for large farming
